About Me

Hello, I'm **Felix** – a passionate Informatics student with a strong interest in Blockchain and artificial intelligence. I focus on building solutions that are not only functional but also intelligent and adaptable to real-world needs. For me, AI is a transformative tool that reshapes how we process and utilize information in this ever-evolving digital era.

My Skills

I am a Full-Stack Developer, AI Engineering and Software Developer who consistently applies best programming practices in building end-to-end solutions, from frontend to backend. With a deep interest in artificial intelligence and software engineering, I actively integrate AI technologies into my projects to develop adaptive, automated, and intelligent systems. My work focuses on creating scalable digital products that combine technical precision with innovative problem-solving.

MY JOURNEY

Experience

Roles and responsibilities I have taken on – from instructing and leading to building real-world projects.

Game Programming Instructor Game Development Club

Oct 2024 - Mar 2025

- ▶ Taught basic and intermediate game development using Unity and C#.
- ▶ Guided students in creating 2D and 3D game projects from concept to prototype.

Coordinator Website Starlight UMN 2025

Feb 2025 - Sep 2025

- ▶ Designed and developed a full-stack web application using PHP, JavaScript, and MongoDB.
- ▶ Implemented RESTful APIs for data retrieval and manipulation.

Laboratory Assistant

Universitas Multimedia Nusantara

Feb 2025 - Jun 2025

- ▶ Assisted students with lab equipment and practice sessions.
- ▶ Maintained laboratory tools and materials in good condition.
- ▶ Supported lecturers in preparing practical activities.

President

Digital Interaction Community

Apr 2025 - Apr 2026

- ▶ Led a student organization focused on digital technology and innovation.
- ▶ Established partnerships with other student organizations and external tech communities.

Internship

Work experience as an intern, contributing to real-world projects and growing alongside professional teams.

Fullstack Developer Intern

PT Rigo Inovasi Digital

Dec 2026 - Apr 2026 · Jl. Poris Paradise Eksklusif No.A4 No. 23 Ruko Lantai 2, Poris Gaga, Kec. Batuaceper, Kota Tangerang, Banten 15148

- ▶ Developed and maintained a high-performance web application using Next.js and TypeScript, ensuring type safety and optimal frontend rendering
- ▶ Architected and managed database schemas and server-side logic using Prisma ORM and Supabase, focusing on efficient data retrieval and real-time synchronization.
- ▶ Implemented containerization and deployment strategies using Docker, streamlining the development workflow and ensuring consistent environments across staging and production.
- ▶ Collaborated with cross-functional teams using Git for version control and Jira for project management, contributing to agile development processes and ensuring timely delivery of features.

Software Engineering Intern

PT VEF Solution Indonesia

Feb 2026 - Jun 2026 · Ruko Graha Boulevard Summarecon Serpong, Jln Gading Serpong Boulevard BVA1, Curug Sangereng, Kecamatan Kelapa Dua, Kabupaten Tangerang, Banten 15810

- ▶ Developed and maintained a high-performance web application using Python and the Frappe framework, ensuring efficient backend processing and seamless integration with the frontend.
- ▶ Designed and optimized database schemas using MariaDB, focusing on data integrity and query performance to support the application's scalability.
- ▶ Implemented version control and collaborative development practices using Git, contributing to a streamlined workflow and effective team communication.

- ▶ Participated in project management and task tracking using Asana, ensuring timely completion of assigned tasks and contributing to the overall success of the project.
