Third-year Informatics student at Universitas Multimedia Nusantara specializing in Full Stack Development and Artificial Intelligence Engineering. Proven track record across multiple software engineering internships, delivering enterprise ERP systems, full-stack web platforms, and AI-integrated solutions. Hands-on experience with blockchain technology through participation in international competitions. Passionate about building intelligent, high-performance software that drives real business impact.

Professional Experience

PT Vef Solution Indonesia - Ruko Graha Boulevard
Summarecon Serpong, Jln Gading Serpong Boulevard BVA1,
Curug Sangereng, Kecamatan Kelapa Dua, Kabupaten
Tangerang, Banten 15810

Feb 2026 - Jun 2026

Software Engineering Intern

- Developed and implemented enterprise-level ERP systems using the Frappe Framework, focusing on streamlining business processes for SMEs across retail and manufacturing sectors.
- Engineered scalable backend services using Python and designed interactive, responsive user interfaces with JavaScript to enhance user experience.
- Designed and optimized complex database schemas using MariaDB, ensuring data integrity and high-performance query execution for financial and inventory modules.

PT Rigo Inovasi Digital - Jl. Poris Paradise Eksklusif No.A4 No.
23 Ruko Lantai 2, Poris Gaga, Kec. Batuaceper, Kota Tangerang,
Banten 15148

Dec 2025 - Mar 2026

Fullstack Developer Intern

Chatrigo is an innovative technology platform providing integrated chatbot and automated messaging solutions to enhance business communication and customer engagement.

- Developed and maintained a high-performance web application using Next.js and TypeScript, ensuring type safety and optimal frontend rendering.
- Architected and managed database schemas and server-side logic using Prisma ORM and Supabase, focusing on efficient data retrieval and real-time synchronization.
- Integrated third-party payment gateways (Xendit) and managed webhooks to handle automated subscription billing and payment status updates.

Universitas Multimedia Nusantara - Jalan Scientia Boulevard
Gading, Curug Sangereng, Serpong, Kabupaten Tangerang,
Banten 15810

Feb 2025 - Jun 2025

Assistant Laboratory

- Assisted lecturer in conducting practical sessions for the Operating System (CL) course during the Even Semester 2024/2025, ensuring all lab activities ran smoothly and on schedule.
- Designed instructional materials covering OS concepts such as process management, memory allocation, and file systems.
- Achieved a performance score of 97/100 ("Sangat Memuaskan") in collaboration with the Laboratory Coordinator and fellow assistants.

Game Development Club - Jalan Scientia Boulevard Gading,
Curug Sangereng, Serpong, Kabupaten Tangerang, Banten
15810

Oct 2024 - Mar 2025

Programming Instructor

- Taught 2D game development fundamentals using modern game engines, covering object behavior, collision detection, and animation scripting.
- Led a student project team to design and launch a playable 2D game prototype, integrating creative design with efficient code.

Education

Universitas Multimedia Nusantara - Jalan Scientia Boulevard Gading, Curug
Sangereng, Serpong, Kabupaten Tangerang, Banten 15810

Aug 2023 - Feb 2027 (Expected)

Bachelor of Informatics

- Completed core coursework in Software Engineering, Web Programming, Object-Oriented Programming (OOP), Machine Learning, Mobile Application Development, Cybersecurity, Artificial Intelligence, and IT Management, supported by hands-on projects.
- Participated in the Basic Leadership Training (LDK) program at Universitas Multimedia Nusantara, strengthening leadership, communication, and teamwork skills.

- Competed in the World Computer Hacker League (WCHL), reaching the national stage and developing two blockchain-based projects: Bitlend-ICP and EduChain.
- Participated in the Blockchain Developer Indonesia Challenge (Technofest) by developing a project titled “Notification Gateway”.
- Selected for the AWS re/Start Batch 13 program, focusing on cloud computing fundamentals and career readiness in the technology sector.

Organizational Experience

The Global Game Jam - Universitas Multimedia Nusantara Jan 2025

Event Coordinator

- Served as Event Coordinator for the Global Game Jam (GGJ) 2025, responsible for planning, organizing, and ensuring the smooth execution of the event.
- Oversaw scheduling, activity coordination, and real-time management to provide participants with an engaging and well-structured game development experience.

Starlight UMN 2025 - Universitas Multimedia Nusantara Feb 2025 - Nov 2025

Website Coordinator

- Served as Coordinator of the Starlight UMN 2025 Website, responsible for leading the end-to-end development process from planning to deployment.
- Oversaw UI/UX design, frontend implementation, and backend integration to ensure a seamless, functional, and visually engaging user experience.

Digital Interaction Community - Universitas Multimedia Nusantara Apr 2025 - Apr 2026

President Digital Interaction

Digital Interaction Community is a technology-focused organization at UMN dedicated to fostering excellence in digital innovation, focusing on game development research, competitive programming, and preparing members for national-scale technology competitions.

- Served as President of the Digital Interaction Community, responsible for leading organizational operations, managing competitions, and overseeing the development of digital projects.
- Led teams in developing applications, websites, and other community-based digital products that support learning and enhance members' technical skills.

Skills, Achievements and Competitions

- **Competition** 🏆 (2025): Represented Indonesia Hub in the World Computer Hacker League (WCHL) 2025, advancing from the Qualification Round to the National Round. Collaborated in a multidisciplinary team to design and develop innovative blockchain-based solutions under the theme of advancing Web3 technologies.
- **Soft Skills** (2026): Leadership & Team Management – Experienced in leading teams, coordinating projects, and mentoring members across academic and organizational settings. Communication & Collaboration – Skilled in conveying ideas clearly, managing discussions, and building positive relationships across diverse teams.
- **Hard Skills** (2025): Full Stack Developer & AI Engineer with strong expertise in software engineering and digital product development. Proficient in Go, Java, Kotlin, JavaScript, Rust, TypeScript, C, Python, and C#. Experienced in building scalable web and software systems using various frameworks such as React.js, Node.js, Laravel, and Android/Kotlin frameworks, along with cloud (AWS) and blockchain integration. Focused on creating intelligent, secure, and high-performance software solutions through strong engineering and problem-solving skills.
- **Licenses & Certifications** 🏆 (2025): Completed the HCIA-openGauss V1.0 course, covering core fundamentals and practical skills in openGauss | an enterprise-grade open-source relational database. Topics include database architecture, SQL optimization, data security, backup and recovery, as well as performance tuning. Achieved HCIA-AI V3.5 course completion with a passing grade, covering AI principles, Python for AI, computer vision, NLP fundamentals, model evaluation, and Huawei Cloud AI tools. Demonstrated practical skills in building and deploying AI solutions.
- **Projects** (2026): Participated in the international TEKNOFEST Blockchain Competition, developing a project titled “Notification Gateway”, an off-chain notification monitoring system designed to improve scalability and efficiency in blockchain applications across sectors such as finance, public services, and supply chain. Served as Project Manager and Backend Developer, leading system development and achieving a score of 82/100, with the project currently under continuous development to enhance performance and real-world applicability.
- **Achievements** 🏆 (2026): Developed SARFlow solo in a 12-hour sprint, securing 2nd Place out of all AI practitioners and students at the OpenClaw Indonesia Agentthon.
